ENTER THE SPACE AGE IN TEAM PROJECTS

AN INSPIRATION
OFFICE STUDY

**SAINT STEPHEN'S
COLLEGE-SSC
COOMERA, QLD
AUSTRALIA**

“There is no doubt that technology plays an important role in our lives and it is certainly an integral part of how we operate as a school, responsible for preparing students to meet the challenges of the 21st century – but no amount of technology can adequately capture the spirit of Saint Stephen’s College” says Jamie Dorrington, Headmaster at SSC.

Technology in Education

Saint Stephen’s College students started the third school term with new ‘Team Projects’, ‘Science-in-Action’ and ‘Arts & Applied Technology Precinct’ –billed among the best in Australia in setting learning standards.

“The College has developed a number of technology-rich learning spaces over the last few years including a purpose built Language Centre, iCentre and a special facility for year 7 Maths and Humanities in collaboration with Burling Brown Architects & the Steelcase Education dealership, Inspiration Office’

“These new facilities are designed to promote the personalization of learning, collaboration & communication.”

Classroom Report:

Team Projects has a greater interactive, collaborative experience.
“i wish every classroom was like this.”

‘Team Projects’ is a digital futuristic facility equipped with collaborative learning furniture solutions supported by the latest education technology by Steelcase.

There are 3 digital learning spaces, DS1 is the main space

“Digital content & knowledge is readily accessible to everyone around the settings”

Dolores Santosa – Business Manager

that offers three Media:scape digital collaboration settings allowing up to 6 devices to share, generate and access users on dual screens. Tiered seating around these settings enhance the collaborative experience.

“Offering students a palette of posture & real choice was important”

Simon Brook – Burling Brown

Team Projects by the numbers:

1 Mobile Media:scape setting located at Verb Team tables with adjustable height ‘Buoy’ stools

2 Media:scape settings in enclosed spaces with seating for up to 12 students in each

1 Enclosed Discussion Booth designed for up to 6 students and lounge breakout space for 5 students

2 Enclosed 6 seater collaboration meeting rooms with writable vertical surfaces for building analogue content.

2 Stool height student collaboration zones

2 Active Learning Classrooms utilizing Steelcase Verb solutions

Inspiration Office (Steelcase Dealership) collaborated directly with the leadership team at SSC & also with Simon Brook from Gold Coast based Architectural firm, Burling Brown.

“Offering students a palette of posture & real choice was important. The space was designed to reflect Saint Stephen’s & Burling Brown’s commitment towards digital collaboration & active learning. Every seat needs to be the best seat in the house”

Classroom Report:

The Verb Classroom allows me to really be ‘the guide on the side’
